DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1 – 19, and 23 - 51 drawn to a method for decoding quantized and unquantized data symbols, classified in class 375, subclass 343.
 - II. Claims 20 - 22, drawn to a method of decoding overlapping signals, classified in class 375, subclass 340.
2. Inventions of group I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions, claim 1 drawn to a method for decoding quantized and unquantized data symbols, and claim 20 drawn to a method of decoding overlapping signals.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and by recognized divergent subject matter, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
